

*Family First!* is a unique Ancestry, Web Design & Personalized Service providing you with a variety of designs. *Family First!* desires to assist with your keepsakes, as well as Branding by offering individuals, families, small businesses and ministries, designs that will ideally showcase a unique end result. Individuals and businesses alike need a product to exemplify and exude an aura of quality. With a specialty nested in Small Business and Ministry Branding, the foundational custom designs of a logo, business card, letterhead, envelope and postcard, as well as various other items is to your advantage; utilize this as an ongoing compositional aspect of your future. Templates may also be tweaked and used to creatively enhance an existing vision. A clean, crisp, uncluttered website presence is strongly encouraged to meet the technological demand and complete a stable longevity-based brand.

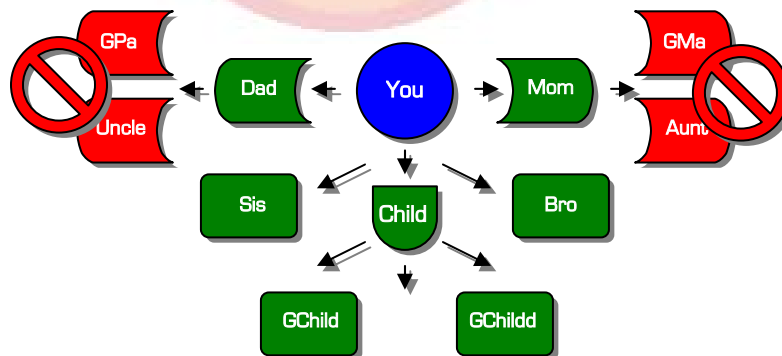

*Family First!* has three primary objectives for anyone lacking knowledge in this technological era. *Family First!* wishes a goal, a mission, and a vision of knowledge, accessibility, and mobility for you, who you are, and where you come from. Armed with information from your families' ancestry, you are then knowledgeable about what you have done as well as what you can do. That Power which flows through you will propel you into greatness... into that which we are all destined!!

*Ecclesiastes 9:5&6* tells us: "For the living know that they will die, but the dead know nothing; they have no further reward, and even the memory of this is forgotten. Their love, their hate and their jealousy have long since vanished; never again will they have a part in anything that happens under the sun."

"...And even the memory of this is forgotten..." Why would you dare forget their toil? Use your people! Use all they have given you to better your family and yourself! Allow the creation of your "*Family First! Legacy Profile and/or Legacy Pictorial*" to exemplify your greatness and reap the rewards your gift in history. Many wise people have stated... "If you know not where you've come from, you are destined to be lost as you travel forward in life". Leave for many generations to come, a testimony of your deep-rooted and extraordinary life.

*Family First!* does not and will not suggest entitlement involving a genealogical background, however we may desire to utilize your preexisting genealogical references where necessary. Working with you presently, and with no more than one generation surrounding you (see example below), will initiate a more consistent and accurate concentration of materials for documenting your future. To better explain the tree under which we'll work together, note the following: 2 parents yield 4 grandparents which yield 8 great grandparents, etc. Surely you can see the multitude! Let us not dig in the past, but plant so the future's harvest is bountiful!

Ex.

Further explaining the rewards of the "*Family First! Legacy Profile or Legacy Pictorial*" is this reality-based analogy:

*While attending a family function, you mention to someone a relative and notice their contemplation as they try and place that individual. They seem to not remember him or her. At that point, they question you as to whom you are speaking of because they can't place his or her face or name.*

At this very moment, you are in a position to offer knowledge and so much more! This is one of many instances wherein having a "*Family First! Legacy Profile*" would be a great benefit to you and your relatives. You would have the ability right there, within arms reach, to display for them history – 'your' history; 'their' history!

A "Family First! Legacy Profile" is complete with information regarding an individual's life, and it may also be enhanced with imagery. You are now essentially an ancestry teacher and equipped with simple, direct information to jog the memory. This will open doors for a trip down memory lane; a worthwhile lesson for all involved! In the event that all goes well, as it is expected, you are also available to take the lesson even further. A visually stimulating well-documented life is right around the corner.

Bring to their vision a "Family First! Legacy Pictorial". Now their able to discuss the many accomplishments and possibly show genetic comparisons, past and present general interests, hobbies and passions. Through this self-created pictorial, housing information that only you (the creator) want displayed, you give to your future all the details of your life, as you'd want them perceived. Show what you feel are your best qualities, trials and tribulations. Ex.
