

Family First!

...has three primary objectives for anyone lacking in this technological era.

- A goal of *knowledge*...
- A mission of *accessibility*...
- A vision of *mobility*...

The Goal:

To bring knowledge of family ancestry to empower people into greatness.

The Mission:

To unlock the doors of a challenged past discover your family worth.

The Vision:

To continually reach into the past to experience lessons and accomplishments to build a better future.

It is utterly important as a people, that *you* realize your potential, allow future generation's access to that greatness, and then continue to inspire and further empower those who will follow. Bishop T.D. Jakes is an extremely powerful advocator of "The Future". Family First! shares his overall message to "team up with your huddle". Family First! says "use your current situation to create a *dream*, then build a solid *foundation* for your descendants to use as a stepping stone". As a people, we need to understand that leaving behind "A Legacy verses A Legality" will give every individual a chance to prosper. In doing so futures are born:

Goal Oriented

Mission Driven

Vision Focused

Their lives are no longer indebted to past financial, ancestral, and spiritual trials or tribulations. It is clearly stated by Ralph Ellison - "*When I discover who I am, I'll be free.*"

Set yourself free to set the future free; start the trend now!

"I hope to inspire you to share in my desire to reclaim a past connection. I pray that you will work with one another on this journey toward a fulfilled and exciting future. Don't let your efforts fall on deaf ears. Christ pushed, you push! He left a word, you leave a word, and ..."

May Your Blessings Be Multiplied!!"
